The rotten little minds that perpetrale this sort of thing have performed quite a job on this latest escapade; they filled explic tanks mar the park's canteen with concrete slabs weighing up to 200 pounds, and it took a work cave all day Tuendsy to retrieber four of them. As if this were not enough, an electrical contractor had to be called in to repair part of the pumping equipment.

contractor had to be called in to repair part of the pumping equipment.

Why Zwick's Island should be the target for these depredations is difficult to comprehend. Not long ago it was the entrance flags which suffered, but now they are taken down every night.

One there

One thing is sure, the vandals find the one thing is sure, the vandals find the park a convenient target. What then is the answer? More lighting, stepped-up police patrolling of the area; an occasional night-time stake-out of the park? Certainly some-thing must be done to curb this problem, and to apprehend the offenders.

That's right. You no longer have to water down your whisky just to get it cool.

You can keep Private Stock, the 29-whisky whisky, in your 'fridge.

And you won't lose any of that great rye taste.

Isn't it nice to know there's a 29-whisky whisky? PrivateStock.

Tonight. Ice up a bottle of Private Stock.

'Man of Peace

If the presence of Pope John can effect a settlement of the civil war between Nigeria and the secessionist state of Befara it will be one of the more welcome accomplishments of the international access for many a day.

Thousands of innocent people have died in Blairs through starvation and this is one of the major reasons why a cease-firs should be effected at the earliest possible moment.

be effected at the earliest possible moment.
But Africa is only one area of conflict.
Vietnam of course drags on and on and there is no knowing when that war will end. Then there is the undeclared war between larsel and its Arab neighbors — re-trained and re-armed by the Soviet Union, cocky and eager to make amends for their heavy detest in the sevenday war of the summer of 1862.

This is as irrational and foolish a war as ever has been fought. It is a war neither side is going to win under present circumstances. It is killing — on the Arab side in particular — for the sake of killing.

Perhaps some influential and neutral mediator like the Pope- could have some impact on this situation too. The tragedy of the Middle East is all the greater for the fact it is the cradle of Christianity now some by ancient and apparently insoluble hatreds.

Long Usage Of Drugs May Be Fatal

EDMONTON (CP) — Common remedies for sches and pains have poisonous, even fatal, effects if taken in heavy doses for long periods.

This conclusion was reached by two Queen's University phar-

or, and any and are, con-varing Core Clampi, gaze a re, port on their study to the annual convention of the Canadian Fed eration of Biological Nocleties. They said that large daily doses of acid and phenacytin, two prevalent ingredients in common remedy tablets, pro-duce toxic effects in gunea pigs if given to the animals over one tenth of their three year life

The drugs affected the brain, ungs, liver, kidney and rev or-tans as well as causing draft. Dr. Boyd estimated the disages given the animals would correspond to about 25 to 190 a.

produce the same toxic effect in

Dr. Boyd said there would be Dr. Boyd and there would be to harmful effects if such drues for taken according to the glu-riment approved labels. Some people, however, took arge doses constantly to releva-te beamatic pains, for example, only to become worse after a

When your intelligencer carrier comes in collect, water Your intelligencer carrier makes it his business to collect at a regular time — convenient to you. That way he comes expected and you can be ready for him.

You can help too, by having the money there when he calls so that he won't have to come back. Because this carrier is in business for himself he depends on the full collection of his route for his full prefit. Repeat calls for him mean extra work with no extra profit.

Ursula fluctuates from the depth of despair to co eding on what this lunatic says to her. It is saible that he is driving her crasy! - A MOTHER.

DEAR MOTHER: That's no drive dear, that's a putt. From your description of Ursula she is one of those unfor hange girls who loves punishment and has found someone who enjoys dishing it out. An emotionally stable girt would not tolerate such abuse. Wacky people have a way of finding each other, and these two co . . .

DEAR ANN LANDERS: I work in a well known store out ten of us gals meet twice a day for a coffee break. Our woman in the group frequently greets me with an air of ph eem for my health. Her usual salutation is,My but you look tired today." This has always rubbed me the wrong was but I've never said anything.

This morning she said, "Are you all right?" You look as if you haven't slept in a week." I lost my cool and replied in a frosty tone, "I am not tired at all. In fact, I've never felt better iii my life." The woman stood up and shouted, "What's wrong with you, anyway? Being tired is nothing to be ashamed

I'd like your opinion all this exchange. A third party said I was wrong - that the woman was really a friend or she ould not have been concerned about me. Do you agree? -

DEAR FINE: A conversed friend doesn't tell you how tired you look. Sugh remarks are not helpful. They are

A First for Quebec

This is Quebec's first nuclear power station under construction on the south shore of the St. Lawrence River at Gentilly, about 100 miles northeast of Montreal. The \$108,000,000 nuclear station

is the first in the world to use natural uranium fuel, a heavy water moderator and boiling light water — ordinary water — as the reactor coolant.

Protest Over Protest to Planning Board

A move by Zdenek Kvarda to have all reference to a let-ter of objection to the propos-ed Four Seasons building of Belleville's waterfront delet-mil from the minutes of July's planning board meeting was defeated last night.

instead, planning board embers decided W record letter as an unsigned ob-

petion.

The letter, members were told, was delivered by city lawyer Stewart Robertson to planning board staff member Art Jones two hours before he July meeting.

Vietnam Puzzle

Victnam presents a puriling situation III the moment. On the one hand the Minon administration is said III to optimistic about the continued but in the fighting. This is sent as a sign that the Communita wish to de-exclate the war and it if continues there may be further U.S. troop withdrawais, up to 100,000 this year.

If the fighting at the moment is on a reduced scale the Communists are active in other ways. A case in point was the Viet Cong commando raid on a hospital regarded as one of the most secure U.S. bases in Vietnam,

In shother incident four explosions believed act off by the Viet Cong killed eight persons, injured 18 and buried many more at a South Vietnamese air force school in Salgon.

Victanance air force school in Salgon.

The Communists may have reduced the scale of the fighting but this may indicate merely a writch to psychological warfare. Enter these subtle methods aimed at undermining the Alitical date. If they aucced in overthrowing the Salgon government it would as great an achievement as any military victory. The Americans must move wartly sit this situation if the virtuana continct is not to democracy in that was-leven lead, of the cause of democracy in that was-leven lead.

Tennis Popular

The "anyone for tennis" routine which Canadians — slow is accept the game as one of the finest and most demanding — are prone to effect, is slowly giving way is increasing

There may not be any champions in the making down at Zwick's Island, but the interest nevertheless is there and as coaching continues improvement is sure to come among those new to the game.

Certainly tennis as played by the Pancho Gonzales' and Rod Lavers of the world is a far cry from the mock gentility many in this country attribute to the game.

As for local enthusiasts there is still plenty of tennis-playing weather left. Maybe by next year there will be some among the new crop of players who are ready for tournament play. Such a tournament would be an excellent addition to the local sporting acene.

Living Proof

The skeleton of the Brooke Bond builds is taking shape and it should not be long before this fine addition to the Belleville before this fine addition to the Belleville industrial exteate near Highway 401 it wisual and living proof of the city's growing prosperity. Hitherto, Superior Electric and Black Diamond, on the other aide, were the only plants offering visual proof to travellers on 401 of the industrial scene here. Now things are changing as the industrial tempo here quickers.

British Pound Is Under Pressure Due to Franc Devaluation

wholesale and retail prices until Sept. III while it prepares a package of economic measures for a special session of the Na-tional Assembly. Currency dealers in Lendon, Paris, Geneva and Frankfurt predicted a weaker pound and a rush to buy West German marks: They said II there were serious speculative movements,

British morey traders said that even if speculaiors put pressure on the pound again, the country seconomic pointed is cound enough to make pre-ports of smoker British deval-uation unlikely. The last deval-uation of the pound was in Nov-ember, 1987.

the French devaluation did not theyatim the pound.
Harold Lever, fituacial section-tary of the treasury, said in a radio broadcast: "French de-valuation has been on its way for some time, but I cannot see how it will make the pound more v u it n e a b i e from any angle. J am absolutely satisfied we have nothing to fear."

on a series of sconorde measures to back up devaluation.
He warned that these measures would be implement.
He statt they would be longer as ge "incursival reforms" without which, in one, two or three years, the French would find themselves again in a situation "precisely the same" as that which led to devaluations.

Competition for Industry

The city of Brockville is upset because anticipated government aid for a new industry was not forthcoming recently—and this despite the fact Brockville has been declared eligible for aid to industries wishing to expand locate there.

According to the Brockville Recorder and Times, Mayor John Broome revealed last week that an industrial firm had decided in favor of the city, had agreed to purchase land and was ready to complete the deal in the feeling that ald would be forthcoming.

But the company's application for a grant was turned down by the Ontario Development Corporation — on a technicality The Recorder d Times says involves an in-depth survey of

"In the meantime, however, the city will lose another industry. The last ope went to Belleville, a city that is not entirely suffering economically."

Which Believille industry the newspaper is referring to is not made clear, but recent additions to the city's industrial scene are Brooke Bond and Chromalloy, the latter a rpet dyeing and finishing plant.

The Recorder and Times concludes, "The anger in any government incentive program is that the program becomes involved in politics. It is for this reason that we would like a government agency to prove to us that lieville is worse off than Brockville, Kingston

This seems an unnecessarily complicating suggestion. While Brockville's loss of an industry is unfortunate, for technical or whatever reason, it cannot be said that that city is budly off either.

Brockville, with about half the pr Stockriffe, with about hair the population, is about as well placed as Belleville to attract industry. However if things are beginning to look up for us here in the Quinte area it is because 67 long and patient effort on the part of the Industrial Commission. For years the fifty's industrial base remained virtually nchanged only in pick up in the last year or so. In other words we have had ill work for at we got

Lately the area was omitted from the new designated regions for federal industrial innecutive grants but as Industrial Chairman Geraid Joyce noted, the city and surrounding area "has the logistics and economic potential" to attract industry on merit alone.

It is a challenge to which we feel Belleville, with its growing confidence and attainments, is equal. New industries will not fall into our lap, but with more of the kind of effort nced of late the city has much to gain

U.S. Violence

The "law and order" which President izon has promised to restore iii American cisty is as elusive as ever.

There are more privately-owned guns — nillions of them — in the hands of Americans han in any other country in the world.

There are probably more psychopaths, idealis and mental defectives in the United ates than in any other country.

These two conditions make for an angerous a society overall as any in the world. More people die from gunshot wounds and quirtes from assorted other weapons in the faited States than anywhere else on earth.

Mr. Trudeau's Theories

Are Canadians well informed about national affairs? Certainly we are not the type who sit around holding informal bull sessions on politics, whether parliamentary or international

There is pienty of evidence, however, of awarenass off what is going on. There is the pertlamentary scene in Otlawa, there are the meetings of MPs and constituents and there is the new phenomenon of public protest and public dissent.

Canadians are concerned about Victnam, They are concerned about Biafra and the thousands starving there. Oraphic pictures of the latter iragedy were shown on the CBC's late-night news recently. This kind of contact ante-hight news revently. This sund of contact between government and people is close to what Prime. Minister Trudeau during his election campaign called "participatory democracy." Not some revolutionary new soncept of government, not something approaching "mob rule" with everyone getting into the act, but rather a "need to explain people to people and people to themselves ---"

In a recent interview with the well-known political journalist Peter Newman, Mr. Trudeau skid: "I personally never realized the extent to which the different parts of our country didn't explain themselves ill each other - - - "

The Prime Minister noted that because of this gap in knowledge there was a serious danger of "disruption in our society," and added, "For example, I was getting cliches from the prairies before I went there, from my own people, from some of our members of Parliament. When I got there, I found farmers raisament when a governey, a some nature asying things for instance about the auto pact and why did we give \$42 million to the automobile industry in the east and nothing to the farmers? Well, it? difficult but there is a good answer to that.

a good answer to that...

"And no one is stelling the farmers the furth about so-called favors to Onlario and Quebec -- perhaps the past has been wrong, perhaps some of the things we've done have not been right but it hate to see there is nobody in the country telling the truth to the people, instead of setting them pick up the eithest.

"Some," Mr. Trudeau said, "do it for political reasons because they want to hurt this particular governmental party but others, you know, the gditors, commentators and just common citizens are not well-informed shout the common citizens are not well-informed shout the country --- so in participatory democracy, the country --- so in participatory democracy, but the product of the country in the

What the Prime Minister is implying, of course, is the best of all possible workin which politics clearly is not. The truth is many things to many people depending on their political views, As writer Newman so apply put it, Mr. Trudestu was making it all sound so aimple, "gipting in beautiful clear—cut hanguage beautiful clear—cut theories about the needs of society."

"But as the Vancouver episode the very next day demonstrated, words that can make theoretical order out of situations seldom stand up to the irrationality of events - - - "

same up to the irrationality of events -- "
Mr. Trodesu charges (Canadian -- citisma
and the press alite -- with being ill-informed
and with failure to expound the truth, but he
must sake himself if he too is being frank
with the nation. Rule 78C, for example, is a
measure designed to limit debate, to restrict
he public's right to a full accounting in
Partiament, when it reassembles in October.

Does the Prime Minister himself have all the anxievra? For example: He said there is a great anxievrate to why the auto industry gets \$22 million while the western farmers suffer (although of course some measures, in the form of grants, have been taken of last to ease their plight!) but he did not outline it blines!?

himself.

It is true we all need to be better-informed and to make our views known on the lawse of the day, But no one has a mode sense of the farth. In no one has a mode sense the truth—not Prime Minister Truckens, Parlament liself, not the people. It democracy however, a participating democracy as Mr. Truckens terms it, we can try and get as close to ill as possible.

Charming Snake Charmer

Maxilyn Hawkee explains to a visitor to Jungie World, a sk-sere mena-tic of jungle animaks near Sarnis, Ont, that the huge snake is hot as dear-ous a neckless of a people think. A student at London's Royal Academic ching, Marilyn, 23, took a summer job as a Jane-type guide. Clad in a h-Ropayat dain, the balase visitors on a tour of about 55 animaks.

Obtawa has come far in 15 years. If has coyed the kind of development any city of importance descrees. It is the sort of thing wish for our own community eventually, to the financial screws are loosened and igher centres such as Betieville come into troops.

Escape Route Closed

Bast Germany is one of the most tightly shall nations of the Communist world. Recape from any of the satellites is difficult enough but the Ulbrich regime il Rast Germany is perhaps more subservient to the Monoov line than most and backs this up with ruthless measures to keep its distency at home.

The country of course suffers badly by mparison with affluent West Germany with Western concept of german freedom, and is is one reason why a sizeable number of Germans eltempt to reach the West spense. Unfortunately, many such attempts have side by failure.

CABLE TV-

The Answers Are Quite Simple

1. BETTER RECEPTION

Cable TV provides you with sharper clearer picture than you've ever enjoyed before.

2. BETTER COLOR

If you should own a color set, Cable TV is the answer for the best color reception in the area.

3. MORE CHANNELS

Then of course with Cable TV you enjoy a greater number of channels which means a greater variety if programs.

4. FREE ANTENNA OR TOWER REMOVAL Cablevue will remove your present antenna or tower free,

HIGHER EDUCATION.... VIA A NEWSPAPER ROUTE

Why do educators frequently en-courage youngsters to apply for a newspaper route? And why are more and more schools giving "credit" for newspaper route experience?

He buys at wholessle—sails at re-tail—makes his own deliveries and collections—learns simple book-keeping—and often develops into a surprisingly good selseman.

And the money he hashs while a

And the money he banks while a newspaperboy frequently makes it possible for him to attend the college of his choice.

If you think your son or some other youngster might profit from news-paperboy experience, have him come in and talk to us.

Looking back on the past year, I believe that Lobiews "New Look" is more than just fresh paint, and new fixtures. Most of all own "New Look" is an attitude. It a reflected in our stores, by everyone from the parcel boye to store managers who operate or the theory that the overformer is base. That may sound like a refreshing idea to you—bot that's the apirit at Lobiews these days.

A Burned Hand

Perhaps a burned hand is not an emer-y in the category of an accident or dimeter, coloring many casualties and serious injuries, retributes the Bloomfield woman who drew saint when she acought treatment at the tripuncy ward of Prince Edward Hospital in ton, and again at a doctor's office in the m, deserved better.

wm, deserved better,

Burned when a cignrette lighter exploded,

s woman finally had to go to Belleville
menral Esopilal for frestments. Burne can be
rious, yet according to the woman to subsand, the hospital administrator told him
opile misunderstood hospital rules and the
rupes of the emergency word, alan) at the
color's office a nurse advised that the hand
odd to trested, "no marp's you had better
add to trested," no marp's you had better
field in Belleville." The woman's own doctor
does no Belleville.

There are questions here that should be cleared up by the authorities. The public is entitled to know why a patient with a burned hand or any other in jury cannot obtain treat-nent at the nearest facility. The official silence on this matter is not good enough. The hospital board is meeting in September and an explanation should be given then it not earlier.

But diffilliationed with the anomalies and
shortages and hardships of Communism
But diffilliations of the Communism
But diffilliation to learn guardia.

The control of the Communism of

This is subversion in his most classes form as outlined in the Communist textbooks. This is how the Communist seek to exploit the Western world's trouble-spots. Che Guevara, who helped Castro to power, tried it leading a guerrilla force in Bohiria but was killed in action.

Guovare at least was a true revolutionary, a legendary figure who believed in what he was design. But the rable who are hall disciples, the FAL in Cauche and the Black Panthers of the FAL in Quebec and the Black Panthers of the FAL in Quebec and the Black Panthers of the FAL in Cauche State among others, are the dropouts and dissidents of society who follow the path of anarrhy only because they are failures in one aphere or another.

one sphere or another.

That these people are dangerous though is undentable, As Mr. Bertrand points out: "The climate of violence is giving Quebes a bad image. I see this in our borrowing and in our search for capital."

It is as simple as that it is just as Castro and the other leaders of the Communits would want it. And that is our problem in the West.

Fire Protection

The problems of fire protection in Prince Edward County township areas are three-fold. There is the question of cost. prohibitive for many—and of remotences (often the damage is done before fire trucks are on the scenes) and thirdly lack of adequate water supply for the positive of the control of the control of the county of the control of the county of the county

the truck.

Be that as it may, round firm on farms in Sophiasburg and North Marysburg townships illustrate the difficulties facing areas likes these. A stack of hay and a utility shot were destroyed in a Demonstrille fire recently, while just the other day more than 8,000 bases of hay and a barn met a similar fate in North Marysbury.

Maryscury.

In both cases county fire departments refused to answer the slarm. Quite simply the fires occurred in manicipalities which have no fire protection of their own and which have no agreement with the areas which are correct. Pur example Fision, Bloomfield, Weilington, and Ameliabotty are members of a mutual aid fire protection plan.

Die protection plan.

County Warfen George Fester, who is also
Reere of Sophiasbury, is quoted as saying be
would like to see an arrangement with the
Camp Ficton fire department again. But with
the array camp near closure its equipment is
no longer available to the county's unprotected townships. Though still is five camp it has

The choice before the townships is to provide their own service or else pay for production by the areas covered by mixtual aid. If they can do neither then they must face consequences similar to the recent outbreaks in Sophiasburg and North Marysburg — or

Accident Aftermath

We can acarealy blame tourists for their dden interest in Chappaquiddick Island, ms of the recent accident involving Senstor ward Kennedy and Mary Jo Kopechne. But ere are limits to this, as we shall see.

there are limits to this, as we shall see. Miss Kopschon, a friend of the Einnedy Smally, was drowned when the senator's care want off a wooden bridge late water. The ferry which Senator Kannedy said he was heading for when he tooks a wrong turn is now doing more business than ever. Some 400 care and year efferted across from Martha's Vineyard. Last year's record was 300 and that water will shore the neverings.

The upshot is that the ferry does not run time anymore and the residents of appaquiddlek naturally are disturbed.

Chappsquiddick naturally are disturbed.

However, asked from the accident and its consequence, if is the psychology of this modern catagories of the modern catagories of a time promise made naturally of a time, remote infance into promisence that is interesting. It has the own the many of the modern part in like country and insmendately become involved its some way with more become part in like country and insmendately that place or region is 'on the map."

We recall during through morthern Michigan a decade or so ago and seeting a Michigan a decade or so ago and seeting a beginning of a leviner. Right away our interest in the arms usual quickened.

But there is a point where such interest can turn sour. At Chappaquiddick, for example, people are streaming to the scene of the tragedy. They are even "chipping away spitiaters of the bridge to carry off as souven-irs," to quote one observer.

The cottage where Kennedy and his friends had a cookout before he and Miss Kopechne drove off is another mecca for tourists, and they take pictures of each other there.

It is all rather sed. The accident is one thing, already discussed in full. But in the affermant here are far-reaching consequences, not least this revealon of some psychological mailsies in the minds of large numbers of people, a testelessness in the mass mind that beings jitself in situations such as this.
